

PLANTING SITE ANALYSIS CHECK LIST

HEAT # _____

(Check appropriate response, or cross through the box if Not Applicable)

ADDRESS:

House#	Street	Zip	Neighborhood

UTILITIES

- Minimum distance from water box or fire hydrant is 5 feet
- Minimum distance from street lights is 15'
- Minimum distance from manhole covers or catch basins is 10'
- Requires Utility Compatible species due to overhead wires
- Not in direct line with front door of residence or business

INTERSECTIONS

- Planting site minimum 30' back from STOP sign or traffic light
- Planting site minimum 30' from intersection apex if no stop sign present, or minimum 10' from driveway

PLANTING BED DIMENSIONS

- Unpaved planting median already 5 feet wide or more
- Planting median needs to be widened to 5 feet, making sure a minimum 48" sidewalk width remains for pedestrians. Length of cut to be 10'
- Paved surface at this location. Planting bed needs to be cut out minimum 5' X 10'

TREE SPACING

- Minimum spacing for 'small ornamentals' such as flowering cherry = 20 feet between trees
- Minimum spacing for 'shade' trees = 30 feet between trees

SPECIES RECOMMENDATION (city makes species decision)

Genus	species	Common Name

NO TREE ALLOWED

- Insufficient planting space
- Other reason
